Syntax S14d lamp holder kit for linear LED bulb

Finish: Black

Product short description:

Syntax® is the revolutionary S14d lamp holder created to allow the infinite potential of linear LED bulbs to be expressed.
Lighting enthusiasts finally have the opportunity to showcase linear bulbs in never-before-seen configurations: simply connect them to this special holder and let them shine in wall or ceiling installations.

Syntax® can be connected with a cable clamp to any round or braided cable in our range or combined with our metal extension tubes to create a pendant lamp. Combine it with a curved extension tube, a swivel joint or directly with a ceiling rose to create an elegant wall light.

The total black version with a cylindrical cable clamp will be perfect for lovers of minimalist style. The aluminium versions include a Syntax® lamp holder with S14d fitting and a cover, the accessory that allows you to cover your lamp holder hiding the cable clamp. This metal lamp holder cover works as a cover for the S14d lamp holder and is available in different finishes: choose the one that suits your style.
