Fermaluce S14 System, adjustable flush wall lamp with S14d fitting and oval wooden ceiling rose

Light bulb: With bulb

Finish: Copper anodised aluminium

Product short description:

Fermaluce S14 System is the wall lamp created with Syntax®, the revolutionary lamp holder with S14d fitting designed to enhance the infinite potential of linear light bulbs. The Fermaluce S14 System design is the perfect combination of aesthetics and functionality, which enables you to experiment with a wide variety of increasingly diverse solutions.

Therefore, thanks to its flexible joint, this wall lamp can tilt up to 90° and rotate 315°, making it possible to direct the light beam to specific areas, thus adapting the light to your individual needs. The total black version with a bare Syntax lampholder is perfect for lovers of a minimalist style, while the versions with a white or metallic cover is ideal for a more daring style.

You can choose with which linear LED bulbs from our catalogue you want to match it: available in three sizes (30 cm, 50 cm and 100 cm) and four finishes: transparent, golden, smoky gray and opal.

Syntax® is a Creative-Cables worldwide exclusive product, designed by studio RLON.
