Globe LED Lightbulb G150 Smoky Floating Collection 6W Dimmable 1900K

Product short description:

Warm, intriguing, unusual. The lightbulbs from the Floating collection, faithful to their name, create a fluctuating light that gives a unique setting to every room. Decorative, designer lightbulbs that add a touch of personality to any space (turning our everyday life into a dream).

The Globe G150 Smoky from the Floating collection, with a 15 cm diameter, can be used to light up a reading nook, placed besides plants and small decorative trinkets, or to bring warmth to a dull corridor. Thanks to the round shaped filament suspended over the lightbulb and highlighted by the smoky colour, rest assured you will be wooed.

Decorative lamps.

Attention: to dim a LED lightbulb you will need a specific dimmer or the new generation of universal dimmers. You will find a selection of models right here, on our website.

Product description:

Lightbulb type: LED
Shape: Globe
Fitting: E27
Width: 150 mm
Length: 185 mm
Volt: 220/240
Watt: 6W
Light colour: 1900 K
Rendered Lumen: 260 Lm

Dimmable: Yes

Our dimmable lightbulbs with straight filament work with any dimmer (TRIA or IGBT), whilst for the lightbulbs with curved filament we truly recommend the IGBT dimming.

To pick out the variator: consider both the maximum and the minimum power of the operator, because if the regulated power goes under the minimal licensed power, the operator can flicker or be damaged..
