Globe LED Lightbulb G200 Smoky Floating Collection 6W Dimmable 1900K

Product short description:

Our Floating collection was designed for dreamers like us, that want to furnish their rooms with unique, out of the ordinary pieces. The name speaks for itself, every item in this collection emanates a warm, suffused light. This will create a unique ambience (romantic even, if we may say so ourselves).

Thanks to its 20 cm diameter, the G200 Globe reaches its full potential when suspended, whether on its own or with other lightbulbs from the collection, in same or different sizes. The smoky colour adapts itself to any style, the globe shape really catches the eye of people that love classic environments, even though its perfect in industrial or minimal chic houses.

Decorative lamps.

Attention: to dim a LED lightbulb you will need a specific dimmer or the new generation of universal dimmers. You will find a selection of models right here, on our website.

Product description:

Lightbulb type: LED
Shape: Globe
Fitting: E27
Width: 200 mm
Length: 230 mm
Volt: 220/240
Watt: 6W
Light colour: 1900 K

Rendered Lumen: 240 Lm

Dimmable: Yes

Our dimmable lightbulbs with straight filament work with any dimmer (TRIA o IGBT), whilst for the lightbulbs with curved filament we truly recommend the IGBT dimming.

To pick out the variator: consider both the maximum and the minimum power of the operator, because if the regulated power goes under the minimal licensed power, the operator can flicker or be damaged..
