Globe LED Lightbulb G300 Smoky Floating Collection 8W Dimmable 1900K

Product short description:

Looking for a lamp and an interesting piece of furniture all in one? We present to you the Floating collection, that thanks to its unusual soft suspended filament creates intriguing light patterns, accentuated by the smoky glass.

Important and charming, the Globe G300 reaches its full potential when suspended, becoming the Queen (with a capital Q) of the living room, creating the perfect vibe in the bedroom or bringing warmth to all your favourite corners of the house, for example the comfortable armchair you sit on sipping tea and reading a book on rainy days.

Decorative lamps.

Attention: to dim a LED lightbulb you will need a specific dimmer or the new generation of universal dimmers. You will find a selection of models right here, on our website.

Product description:

Lightbulb type: LED
Shape: Globe
Fitting: E27
Width: 300 mm
Length: 320 mm
Volt: 220/240
Watt: 8W
Light colour: 1900 K
Rendered Lumen: 350 Lm
Dimmable: Yes

Our dimmable lightbulbs with straight filament work with any dimmer (TRIA o IGBT), whilst for the lightbulbs with curved filament we truly recommend the IGBT dimming.

To pick out the variator: consider both the maximum and the minimum power of the operator, because if the regulated power goes under the minimal licensed power, the operator can flicker or be damaged..
