

PRODUCT DESCRIPTION

- A miniature device that allows you to adjust RGB and white light colors using smartphones and tablets
- Thanks to the unique μ WiFi technology, it allows you to control the lighting wirelessly
- Does not require additional control modules, hubs or central units
- Connection with access from anywhere in the world (only internet access required)
- You can turn on/off the lighting using the application or the bell push
- Has an advanced lighting effects editor with a schedule and a palette of favorite colors
- Fits perfectly with LARKO-50, KOZEL-50 profiles and profiles with larger dimensions

TECHNICAL SPECIFICATION

Application

- to control voltage RGB+W LED
- intended in particular for lighting residential and commercial buildings as well as for accent lighting in architecture

Mounting

- surface mounting using double-sided tape (not included)
- can be installed in an electrical box or a housing of a lighting fixture

Additional information

- supply voltage: 12V-24V DC
- rated current: 12A / 3A per channel
- power: 144W (12V), 288W (24V)
- IP protection: IP 20
- power consumption: < 1W
- transmission frequency: 2.4GHz
- housing made of halogen-free polyurethane composition, self-extinguishing for thermal class B (130°)

- protection: reverse polarity, ESD

Dimensions:

- length: 39 mm
- width: 35 mm
- height: 18 mm

Communication	Wi-Fi
Input Voltage	12V
Input Voltage	24V
