

**PRODUCT DESCRIPTION**

- Possibility of installing sealed 8K series LED strips
- Wide range of accessories
- Small bending radius

FINISH :

Silver anodized

Black anodized

**TECHNICAL SPECIFICATION**

**Application**

- main, functional, furniture and decorative lighting.

**Mounting**

- to the surface, suspended or recessed, using dedicated accessories, properly selected screws, double-sided adhesive tape or mounting adhesive,
- the cover is cut to the length of the profile,
- easy assembly and disassembly by snapping in and out.

**Additional information**

- possibility of making a linear fixture with IP67 protection, which means the fixture is dustproof and waterproof
- line of light obtainable with the LIGER cover an LED strip with at least 120 LED/m 9.6W
- space for LED strip: 14 mm

**Profile bending with covers: HS, LIGER, KA.** Can be bent in the plane adjacent to the LED strip.

Minimum internal radius	Minimum external radius
180 mm	200 mm

- minimum radius - bending radius which when exceeded causes destruction (deformation, bending or lack of compatibility with other accessories, e.g. covers, end caps, etc.) of the profile
- internal radius - refers to the profile bent so that the cover is facing the inside of the arch
- external radius - refers to the profile bent so that the cover is facing the outside of the arch

- irregular curves are possible after consultation and individual quotation
- when bending anodized profiles, one should be aware of cracking of the anode coating (which may be more or less visible depending on the radius)

## AVAILABLE LENGTHS
